

## ワーク内側面への塗布に最適

Best suited for dispensing to the inner surface of a workpiece

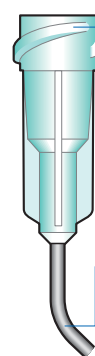

ワーク側面の塗布に

### 特長 FEATURES

- 流動特性に優れた曲げ加工により安定吐出を実現。
- 2種類の角度と豊富なバリエーションにより幅広い用途に対応。
- 大きな4枚羽設計によりシリンジへのねじ込みが確実。

- Stable dispensing achieved thanks to bending with excellent flowability.
- A variety of curve needles in two angles after a wide range of applications.
- The large four-vane design allows the user to mount the needle on the syringe securely.

2条ネジ設計

Double thread screwed design

流動特性に優れた曲げ形状設計

Outstanding curvaturer design, offering rich fluidity characteristics
