

内径φ0.02mm

φ数十μmからのマイクロディスペンスを実現

ID φ 0.02 mm Micro-dispensing, as little as φ several tens μ m of dispensing available

● 超高精細・描画塗布
Ultra-high definition drawing dispensing

特長 FEATURES

- MUSASHIディスペンサーとのシステム化により**極小・打点塗布**および**超高精細・描画塗布**を実現。
- 塗布目的に応じて選べるノズル内径、**φ0.02mm**～**φ0.60mm**の**12サイズ**をラインナップ。
- **気密性が高く、低粘度液剤に最適**な、針元2条ネジ仕様もラインナップ。

- Incorporation of these super-fine nozzles into MUSASHI dispensers allows to perform super-fine dotting and ultra-precision drawing.
- 12 types from φ0.02 mm to φ0.60 mm of nozzle inside diameter are available to satisfy the wide range of your demands depending on dispensing targets.
- We newly added a double-thread-screw-type needle holding body to our product lineup, which is excellent in air tightness and is best suitable for low viscosity fluid.
