“Dispensing Accuracy” that we have upgrade.

All for high quality dispensing.

Merit 1

**エアパルス安定回路 (PAT.) を搭載し、
優れた吐出精度を実現。**

Excellent dispensing accuracy achieved thanks to integration of diversified sophisticated features including air pulse stabilization circuit.

Merit 2

設置面積65%のコンパクト化を実現。

Compacted installation area by 65%.

Merit 3

**入力信号切換ディップスイッチの設定により、
「無電圧」または「加電圧 (5V/12V/24V)」の
入力信号を選択可能。**

Input signal selectable between “no voltage” and “applied voltage (5V/12V/24V)” by use of input signal selection DIP switch.
